Acknowledgement

It is a pleasure to use this opportunity to thank Sue Clark for her tremendous contributions to this book as our chief editor. She has unmatched wordsmithing skills and a pleasant demeanor that make her a wonderful colleague on all of our projects. May our readers know that she is the “talent behind the curtain”; and she knows that we are grateful for all she does to make our words shine.
Preface

*Acceptance, Understanding, and the Moral Imperative of Promoting Social Justice Education in the Schoolhouse* examines the critical issues associated with the topic of social justice in preschool through grade 12 (P-12) education. This book is most appropriate for preservice and veteran teachers, school and educational psychologists, related special education service professionals, educational administrators, guidance counselors, graduate education professors, policy-makers, parents and student leaders who wish to gain a better understanding of how social justice can and should become a valuable part of the educational landscape.

Understanding the challenges related to educational inequity requires a comprehensive and systematic re-examination of educational reform; more specifically, this book defines social justice education, offers different perspectives from major thought leaders, and examines the challenges faced by different populations when it comes to receiving equal opportunity and treatment. Emphasis will be placed on programs, approaches, and strategies to increasingly teach tolerance, respect, and understanding within and between these groups and members of the majority culture. The focus, then, will be educational practices designed to prepare students from diverse backgrounds to be active, contributing, and fully participatory members of our contemporary society.

Our motivation for writing this book arose due to…

- Our concern that due to race, ethnicity, gender, socioeconomic status, and so many other indicators, all students in America are not given the same opportunities in school;
- Our belief that helping educators understand and implement social justice in the classroom will increase the equity between students;
- Our awareness that equity in the classroom is the first step to more positive social and academic outcomes throughout a school career;
- Our knowledge that students are our greatest hope for the future and providing them with equitable opportunities in
